Chinese Government Sent Millions in Payments to Biolab in California

Rep. Mike Gallagher (R-Wis.) is [investigating an illegal biolab](#) located in Reedley, California. According to Gallagher, the biolab received [“over two million dollars of unexplained wire transfers from China.”](#) Local officials in Reedley reported that the FBI did not investigate the biolab because there was no evidence of weapons of mass destruction, and the CDC was forced to investigate after a local congressman called attention to the lab.

The biolab was discovered to contain dangerous pathogens when it was eventually investigated by the CDC. Gallagher reports that investigators found a freezer labeled “Ebola,” saying, “There was a medical grade freezer, and inside were these sort of silver Ziploc bags. And because the bags themselves were not labeled Ebola, though the freezer was labeled Ebola, they refused to even test the sample.”

[The San Joaquin Valley Sun reported.](#) “In May, the CDC inspected the warehouse and found bacterial and viral agents such as chlamydia, E. Coli, streptococcus pneumonia, hepatitis B and C, herpes 1 and 5, rubella and malaria.” The biolab also had hundreds of bioengineered mice. “The county also discovered nearly 1,000 bioengineered mice. Wang Zhaolin, a representative of Prestige Biotech – the company operating the lab – told county investigators that the mice were genetically engineered to catch and carry the COVID-19 virus.”
