busybodies ought to focus on the academic destruction of black youngsters between kindergarten and 12th grade and the conferring of fraudulent high school diplomas. Mac Donald answers the question of whether scientific progress depends on diversity. She says: “Somehow, NSF-backed scientists managed to rack up more than 200 Nobel Prizes before the agency realized that scientific progress depends on ‘diversity.’ Those ‘un-diverse’ scientists discovered the fundamental particles of matter and unlocked the genetics of viruses.” She might have added that there wasn’t even diversity among those white Nobel laureates.
