VIDEO: Dr. Pierre Kory: Big Pharma is Criminal, “Literally Destroying Society”

When the pandemic hit the United States, the mortality rate among the Covid patients that were put on ventilators at hospitals was through the roof, reaching 88 percent in some places. While the government insisted no treatments should be used if they had not undergone a clinical trial, the doctors quickly recognized that critical cases of Covid could be addressed with anti-inflammatory drugs such as corticosteroids and also blood-thinners. When physicians implemented these drugs in their protocols, the mortality among hospitalized patients dropped to almost zero.

Working within the framework of the Front Line COVID-19 Critical Care Alliance (FLCCC) that he co-founded, Dr. Kory studied every scientific paper and every domestic and international piece of data on drugs that could help treat and prevent Covid. In October 2020, after a series of trials and studies, the doctors found that ivermectin, a widely studied drug with an unparalleled safety profile, showed remarkable efficacy in treating Covid. “Basically, ivermectin could solve this pandemic,” said Dr. Kory.

Yet this appeared not to be the case for the Big Pharma companies and federal agencies responsible for shaping the pandemic response. Since they have operated — and continue to do so — under the regulatory capture, their double standards in evaluating drugs’ safety and efficacy were on full display in authorizing and promoting expensive treatments such as remdesivir and experimental Covid vaccines.

Dr. Kory went on to say that, sadly, the regulatory capture consumed not just the government, but also the media and academia, including major medical journals.

Dr. Kory is board-certified in internal medicine, pulmonary diseases, and critical care medicine. He is also a widely published expert on therapeutic approaches to COVID-19 and is deeply experienced in the treatment of COVID-19 in all its phases. More information on Dr. Kory’s expertise can be found [here](#).
