## Nashville “Trans” Killer a Creation of Woke Ideology; Hated Whites, America, Herself

“I have to kill so I can be remembered, in the most horrific way possible that no one will ever forget.” That was a quote from the pages of the Nashville Covenant School shooter’s journals, recently released to House Intelligence Committee and political commentator Megan Kelly.

On March 27, 2023, 28-year-old Aiden Hale (born Audrey Hale) entered the Covenant Presbyterian Church and School while armed with three firearms, including an AR-15, and killed three children and three adults before police killed her. Afterward, the Nashville Police Department admitted to recovering a collection of her writings but withheld them, citing an ongoing investigation.

### Woke Warrior

Police have consistently downplayed the killer’s obsession with “gender identity,” including in its final report on the shooting. The recent release of her writings illustrates why: Hale was a creation of woke ideology.

The FBI released more than 1,000 pages of the killer’s writings. And based on Kelly’s [report](#), they confirm Hale’s obsession with transgenderism and a hatred for white people and America. She embraced wholeheartedly the woke beliefs trumpeted for years by academia, mainstream media, and the Democratic Party.

Hale had been planning her murder spree since 2017, according to the police report. In her personal writings, she idolized other mass shooters and referred to the Columbine killers as “gods.” She was depressed, writing the word “abyss” on several pages of her journals, and she was obsessed with achieving notoriety.

As noted above, Hale, who was white, hated white people, America, and sought “black love.” She wrote:

White people who want to take away instead of adding more. What do you call that? America is not the land of the free, it’s a land full of idiots. It will only get worse in this country, not near enough gods like me. America and its people all destined to soon be destroyed. Hate you all.

### Trans Victim

A great deal of her writings highlight her obsession with transgenderism. She had swallowed hook, line, and sinker elements of the woke ideology. Her writings indicate she wouldn’t have considered being

transgender had the concept not been served to her. She wrote:

I didn't know trans existed. I thought you could only be gay or bi ... but transgender is transcending way deeper to the core.... If I had puberty blockers back then, I would've transitioned a long time ago, but I didn't know you could possibly change your sex. I'm mad that no one told me until I was 22. I feel I'm too old and too late to become a man. Now the process takes months to years. By the time that happens I'm 30. And then 10 years later, I got a bald spot on my head and look like an old man. Hell no! It's best to start it at 16 for shots, but my youth is over, way past now and it's over. Over! How dare God hand me a training bra when I didn't know WTF it was as a kid. I hated it.... We should all choose our gender.

This is not the first time transgenderism has been linked to murder. A small group of brainy transvestites known as "Zizians" are suspected of having ties to six murders across the country. The group's leader, Jack Amadeus LaSota, who goes by Ziz, was arrested in Maryland back in February. Another "member," a German math whiz who went by the name "Ophelia Bauckholt," died during a shootout with Border Patrol agents in Vermont. A Border Patrol agent died in that shooting. Before that incident, a California man who in previous years had rented out property to the trans cult members was found dead. It just so happened that the landowner was set to testify in court about an attack years prior by members of the cult. During that attack, the former landlord was stabbed with a sword. You can read more about the Zizians [here](#).

### **Autism Link**

According to the police report on the Nashville shooting, Hale was autistic. In her well-researched book *Lost in Trans Nation: A Child Psychiatrist's Guide Out of Madness*, psychiatrist Miriam Grossman calls the link between transgenderism and autism "undeniable":

If your child has autistic traits such as social impairment, difficulty adjusting to change, obsessive interests, all-or-nothing thinking, and sensory issues, her or she may be vulnerable to transgender ideology. People with autism often feel different, misunderstood, and isolated. Their thought patterns and non-conformity likely predispose them to recruitment.

### **Medical Malpractice**

Grossman's research reveals that medical groups were hijacked by activists with no regard for science and who sought to normalize transgenderism. She shows how the powerful World Professional Association for Transgender Health (WPATH), the American Psychiatric Association (APA), the American Academy of Pediatrics (AAP), and even the Endocrine Society, pushed through changes in standards without regard to credible science. Endocrinologist Dr. William Malone described an Endocrine Society meeting this way:

They rolled out a set of guidelines for gender dysphoric adolescents and children that really [had] no evidence base, and essentially said that okay, your job as endocrinologists now is to medically affirm children with puberty blockers and cross-sex hormones.... There was no discussion at all. It was difficult even to submit questions after they presented the

guidelines. It was under the atmosphere of “This is how it’s going to be, and if you ask questions, you’re a bigot.”

Grossman includes many other examples. She also highlights the harm done by the medical industry’s recklessness. Despite a lack of mainstream reporting on the matter, medical professionals throughout the West have left clinics that performed transgender procedures. An associate director at a clinic in London that performed “gender transitions” resigned because children were being “transitioned” without adequate therapy. Thirty-five psychologists left for the same reason, according to Grossman.

You can watch a TNA interview with Grossman [here](#).

## **Lawsuits Coming**

Legal experts predict a wave of lawsuits in the coming years. Several are already working their way through the courts. For example, Chloe Cole is suing Kaiser Permanente for medical malpractice. She was given puberty blockers, cross-sex hormones, and a double mastectomy all between ages 13 and 17. Cole’s [testimony](#) is heartbreaking:

My teenage life has been the culmination of excruciating pain, regret, and most importantly injustice. I have been emotionally and physically damaged and stunted by so-called medical professionals in my most important developmental period. I was butchered by an institution that we trust more than anything else in our lives. What is worse is that I am not alone in my pain. I will see to the fact that the blood and tears of detransitioners like myself will not lay waste. It is impossible for me to recoup what I have lost, but I will insure no children will be harmed at the hands of these liars and mutilators.

The law firm representing Cole encourages anyone who’s had similar experiences to contact them.

Another high-profile case is that of Cristina Hineman, who is [suing](#) Planned Parenthood for negligence by providing testosterone without adequate mental health analysis. Cristina’s story is emblematic of so many who were sucked into the trans cult. She became confused about her sexuality when she was young, and peers and people online introduced her to trans ideology. She was diagnosed with autism, and, as so often is the case, met a therapist who “affirmed” her instead of treated her mental issues.

In its short time in mainstream America, trans ideology has destroyed countless lives. Hopefully, the groups and people who brought this on will one day be held accountable.
