Remembering Heroic Doctor, Freedom Warrior Vladimir “Zev” Zelenko

On June 30, America lost one of her bravest and most dedicated adopted sons, Dr. Vladimir “Zev” Zelenko.

Zelenko was much more than a board-certified physician with more than two decades of professional experience. He was also an unapologetic freedom fighter who stood up against the corrupt federal government and Big Pharma and who deeply understood the grave danger that the anti-American forces posed to the physical lives and civil liberties of Americans. While being despised, smeared and attacked by those forces, he gained international recognition as a pioneer of successful early treatment and prophylaxis protocols that saved the lives of the most old and fragile patients.

Dr. Vladimir Zelenko

His Zelenko Labs issued the following [statement](#) on his passing,

It is with immense sorrow that we announce the passing of our founder Dr. Vladimir “Zev” Zelenko. Dr. Zelenko was a physician, scientist, and activist for medical rights who touched the lives of millions of people. Some were saved as his role as a doctor, and even more were inspired by his words.

Zelenko was born in Kyiv, then part of Soviet Ukraine, in 1973. His family moved to the United States when he was three years old, and settled in the Sheepshead Bay neighborhood in Brooklyn, New York.

In 2000, Zelenko earned a Doctor of Medicine degree from the State University of New York at Buffalo. He then served as a longtime community physician in Kiryas Yoel, New York, where he was regarded by many as a beloved member of the community.

When the coronavirus made its way to America and hit New York, Zelenko dedicated his skills to finding the cure, and quickly succeeded. In April 2020, he penned open letters to the medical community and to then-President Donald Trump, detailing his recommended treatment using a combination of the anti-malaria drug Hydroxychloroquine (HCQ), the antibiotic azithromycin, and zinc sulfate:

We know that hydroxychloroquine helps zinc enter the cell. We know that zinc slows viral replication within the cell. Regarding the use of azithromycin, I postulate it prevents secondary bacterial infections. These three drugs are well known and usually well tolerated, hence the risk to the patient is low.

He continued,

Written by [Veronika Kyrylenko](#) on July 1, 2022

My urgent recommendation is to initiate treatment in the outpatient setting as soon as possible in accordance with the above. Based on my direct experience, it prevents acute respiratory distress syndrome (ARDS), prevents the need for hospitalization and saves lives.

A 2020 peer-reviewed [study](#) of the Zelenko protocol, accepted for publication in the *International Journal of Antimicrobial Agents*, found it “decreased hospitalizations by 84% and resulted in a 5-fold reduction in death.” As of [today](#), this translates into nearly 845,821 needlessly lost lives.

In further testimony to the U.S. Senate Committee on Homeland Security in December 2020, Dr. Zelenko reported no Covid deaths among his high-risk patients. These included Holocaust survivors in their 90s, cancer patients, and diabetics, who normally experience up to a 20-percent fatality rate. All patients who followed his early treatment survived, he said.

The treatment was [endorsed](#) by then-president Donald Trump, who announced in May 2020 that he had started taking HCQ to prevent coronavirus infection after Zelenko had brought it to his attention.

Pharma-affiliated government “experts” rabidly criticized anyone who dared use Covid early treatments. Among them was [Dr. Anthony Fauci](#), who sneered at the potency of safe and inexpensive HCQ, arguing that until it proves its worth in lengthy randomized clinical trials, it should not be used. That’s been going on since June 2020, when the U.S. Food and Drug Administration stripped the drug’s Emergency Use Authorization (EUA), preventing distribution from the Strategic National Stockpile.

Tragically unnoticed is an October 2020 paper posted on the National Institute of Health (NIH) website that found hydroxychloroquine “is effective, and consistently so when provided early, for COVID-19.” A real-time analysis involving 313 peer-reviewed studies as of mid-February has come to the same conclusion.

Zelenko worked tirelessly to perfect his prophylaxis and early treatment protocols that used well-studied, safe and widely available medicines and vitamins, and can be found [VladimirZelenkoMD.com](#)

According to his website, his achievements include the following,

- Zelenko Protocol innovator: 99% survival of high risk Covid-19 patients
- Nominated for the Presidential Medal of Freedom
- Recognized as a hero at U.S. Senate Homeland Security committee hearing
- Published in top peer reviewed journals with world renowned physicians
- Provided counsel to White House personnel, multiple governments, hospitals, physicians, public figures.

Besides staying true to his medical profession despite all the hardships, Zelenko [understood](#) the pandemic on a much deeper, spiritual level. The pandemic, he believed, exposed the evil agenda of the elites whose worldview was rooted in Darwin’s ideas of the survival of the fittest and eugenics, which “probably started with the Serpent in the Garden of Eden.” In that system, the elites decide whose life is worthy, and whose is not.

The majority of the people, however, knew that we are all “made in God’s image and we have human rights, and God’s prevue how many of us live on the planet and how long we live.”

The key to winning this existential battle was to get back to God, morality, and community, according to the doctor,

The only reason why this is happening is because we're letting it happen.

There's many more of us than them....

The solution is to rise up in hopefully non-violent civil disobedience, reject all tyranny, reject the dictates of the demented puppet in the White House, and realize we're fighting a well-entrenched enemy that has a headstart. [...]

So my blessing to the whole world, to all decent people is Rise up. This Hill is worth dying on. It's time for us - this generation - to pay the price, so that our children could live with God consciousness, with Freedom, and be able to thrive. Whether or not that will happen, is directly correlated to what we do now, today.

Zelenko urged parents to take their children out of the public schools that posed both spiritual and, with the vaccines' rollout, physical danger, which he compared to child sacrifice.

He described the government's pandemic response, including the aggressive suppression of early treatments, as "evil" whose goal was to kill people,

"Do not listen to the murderous NIH, CDC, FDA, WHO. They're the enemies of the people. Do not listen to their advice, because their advice is a death sentence. They tell you to delay treatment. Do not delay treatment."

A few weeks before the doctor died, he recorded an inspirational address to his supporters.

"When and how you die is not under your control, but how you live is under your control," he reminded us.
