

Case for Immediate Suspension of All Covid Shots: Peer-reviewed Study

“I was willfully blind, certainly in relation to the [Covid] vaccine and the harms. Until I wasn’t,” said esteemed U.K. cardiologist Dr. Aseem Malhotra in the opening statement of his speech calling for the immediate stop of the Covid vaccination campaign.

Dr. Malhotra’s two-part peer-reviewed article titled “Curing the pandemic of misinformation on COVID-19 mRNA vaccines through real evidence-based medicine” (available [here](#) and [here](#)) was presented during a press conference organized by the [World Council for Health](#) on Tuesday, and was streamed live by [The New American](#).

Corruption of Medicine

Coming from the *crème de la crème* of the British medical establishment, Dr. Malhotra, vaccinated himself, first examined the “root cause” of the vaccines’ failure and the overall decline of public health. That, he believes, is a capture of the healthcare authorities and a part of the medical profession, including major medical journals, by large pharmaceutical companies. The profound corruption undermines the principles of ethical evidence-based medical practice and informed consent, argued Malhotra.

Citing a 2021 research paper by Dr. John Ioannidis, “[How to Survive the Disinformation Mess](#),” Dr. Malhotra pointed out that “most published research is not reliable, offers no benefit to patients, or is not useful for decision makers.” One would assume that his or her doctor, who swore the Hippocratic Oath, would certainly recognize the issue and warn about it — but no, said the doctor, “most healthcare professionals ARE NOT AWARE of this problem,” since they often lack the necessary skills to properly evaluate such research papers. (Emphasis in original.) Most disturbingly, the people at the very top of the clinical and academic leadership are “ignorant” of this fact.

Not surprisingly, the doctor continued, “the greater the financial and other prejudices in a scientific field, the less likely the research findings are to be true.”

One should not expect pharmaceutical corporations to care about individuals’ personal well-being and health. “Drug companies have a legal obligation to produce a profit for their shareholders. They do not have a legal obligation to give you the best treatment, even though most of us would like that to be the case,” Dr. Malhotra said, proceeding to walk the audience through the scandalous history of the drug industry, marred by scientific fraud and corporate crimes.

Later in his speech, he touched on how the enormous amount of power transforms the psyches of corporate executives, making them practically inhumane.

**Worse Than the Disease**

Dr. Malhotra then presented overwhelming clinical evidence that vaccines cause more harm than Covid. In other words, he proved that the cure is actually worse than the disease.

As the number of Brits suffering heart attacks was increasing during the year 2021, with one such victim being Dr. Malhotra's father, the doctor started urging his colleagues to closely look at the evidence of heart issues caused or aggravated by the shots.

The doctor cited his discovery of the November 8, 2021 [article](#) entitled "Mrna COVID Vaccines Dramatically Increase Endothelial Inflammatory Markers and ACS Risk as Measured by the PULS Cardiac Test: a Warning" by cardiac surgeon [Stephen Gundry](#). The study concluded that mRNA vaccinations "dramatically increase inflammation on the endothelium," which is a single layer of cells that lines the interior surface of blood and lymphatic vessels. That "may account for the observations of increased thrombosis, cardiomyopathy, and other vascular events following vaccination," per the study's abstract.

Dr. Malhotra explained then that what shots did was aggravate the underlying heart disease, increasing the risk of heart attack from 11 percent in five years to 25 percent, which the doctor called a "huge increase."

Do the benefits of getting a shot outweigh the risk?

Not at all, maintained the doctor.

First, vaccines do not prevent infection; this has been admitted at the highest levels of healthcare agencies in the West. For example, the U.S. Food and Drug Administration [published](#) back in May 2021 that "Antibody Testing Is Not Currently Recommended to Assess Immunity After COVID-19 Vaccination," meaning that the antibodies that a vaccinated person produces are unreliable protection! Yet, all clinical studies done by the vaccine makers quote "antibody levels" as proof that their shots work. That includes the latest trials of the booster that presumably targets the Omicron strain, which measured antibodies in eight mice. Malhotra called it a "miscarriage of medical science."

Furthermore, real-world data shows that shots do not reduce one's chances of landing in the hospital, since to prevent one single Covid death, thousands, if not tens and even hundreds of thousands, of people must receive a vaccine. And many of those who are vaccinated will have serious adverse reactions. Per Malhotra's paper, "the MHRA [the Medicines and Healthcare Products Regulatory Agency of the U.K.] figures show around 1 in 120 suffering a likely adverse event that is beyond mild."

Shouldn't healthcare authorities and regulators be vigilant about such life-and-death issues? Isn't that their primary duty?

In theory, yes. But in practice, they are also captured by Big Pharma, and in many countries around the world, most of the funding for regulatory agencies comes from the pharmaceutical industry. In particular, the FDA receives as much as 65 percent of its funding from the very companies it regulates, notes Malhotra.

The analysis of real-world data on the vaccines allowed the doctor to come to the key following conclusions:

1. The shots offer no protection from Covid infection.
2. The shots did not reduce Covid mortality or all-cause mortality in the original randomized control

studies.

3. As suggested by those studies, one in 800 mRNA vaccine recipients would be seriously harmed by the shot. That's greater than the likelihood of being hospitalized with Covid.
4. To prevent one Omicron-related death in those over 80 years of age, 7,300 people in that age group must be vaccinated. For those under 50, the ratio is one to 10,000.
5. The shots are linked to an unprecedented number of reported adverse reactions.
6. According to real-world data, the rate of harm requiring hospitalization is close to one in 1,000 within a couple of months of the mRNA jab, which is likely a "significant underestimate."

Dr. Malhotra's observations were supported by Drs. Tess Lawrie and Ryan Cole.

Dr. Cole, participating virtually, supports Dr. Malhotra's calls for immediate and complete suspension of Covid shots. Cole explained how the shots code the most toxic part of the virus — the spike protein — into body cells. That protein circulates in our bodies for weeks, and then is produced by our cells for at least 60 days.

What happens then? According to Dr. Cole, some of the spike-induced harms includes the following:

- Viral reactivation;
- DNA mismatch repair inhibition;
- Neurologic damage;
- Mitochondrial damage;
- Heart damage;
- Immune inhibition (original antigenic sin);
- Antibody-dependent cellular cytotoxicity;
- Decreased sperm counts and motility,
- Hormonal dysregulation, etc.

The spike protein is to blame for increased rates of cancer, cardiac arrests, and blood clotting, argued the doctor. It is the Covid shots that are causing excess mortality in highly vaccinated countries.

Dr. Lawrie, a co-founder of the WCH, referenced the WCH [report](#) on the abundant pharmacovigilance data on WHO VigiAccess, CDC VAERS, EudraVigilance, and the U.K. Yellow Card Scheme to suspend the use of experimental Covid gene therapeutics.

After the press conference, Dr. Lawrie said to *The New American*,

Doctors can no longer ignore the fact that they absolutely must join the conversation on vaccine injury linked with these Covid vaccines — a novel technology that has been widely rolled out and never proven safe in animals let alone healthy men, women, and children. They have been deceived and incentivized to turn a blind eye. Now is the time to speak up, and not a minute too soon.

Drs. Malhotra, Cole, and Lawrie are not alone in their calls. Earlier this month, more than 400 scientists and medical professionals from more than 34 countries signed the "[Declaration of International Medical Crisis Due to the Diseases and Deaths Co-related to the 'COVID-19 Vaccines.'](#)"

Speaking with *The New American* on the matter, one of the signatories of the Declaration, [Dr. Naseeba Kathrada](#) of the WCH, said that practicing physicians around the world are seeing an "unheard of"

Written by [Veronika Kyrylenko](#) on September 27, 2022

number of diseases and deaths in healthy people linked to the shots.
