Biden Civil Rights Pick Wrote Black Supremacist Tract, Radical Leftist Would Defund Cops

President-elect Joe Biden has picked a black supremacist to run the Civil Rights Division of the Justice Department.

And Kristen Clarke, a radical lawyer, doesn't just think blacks are genetically superior [Übermenschen](#). The new assistant attorney general also wants to defund police departments.

Yet the appointment is not surprising. Last week, [Biden announced](#) plans to "prioritize" sending Chinese Virus money to minority-owned small businesses.

Thus has the incoming president settled on an anti-American agenda that would "prioritize" the ridiculous claims of the radical Left, not least that minorities can't get a fair shake.

The Letter

Clarke's black supremacist leanings go back to her days at Harvard, where, despite white privilege, she matriculated and graduated. From there she went to law school at Columbia University, again, despite the impregnable wall of white privilege.

That aside, [Tucker Carlson's team at Fox News disinterred](#) Clarke's long-buried past to find some interesting material she wrote for the *Harvard Crimson*.

{modulepos inner_text_ad}

"Please use the following theories and observations to assist you in your search for truth regarding the genetic differences between Blacks and whites," the then-president of the Black Students Association wrote.

Then came a daft if amusing disquisition on black genes, brain chemistry, and early-childhood physical dexterity:

One: Dr Richard King reveals that the core of the human brain is the 'locus coeruleus,' which is a structure that is Black, because it contains large amounts of neuro-melanin, which is essential for its operation.

Two: Black infants sit, crawl and walk sooner than whites.

Three: Carol Barnes notes that human mental processes are controlled by melanin — that same chemical which gives Blacks their superior physical and mental abilities.

Four: Some scientists have revealed that most whites are unable to produce melanin

because their pineal glands are often calcified or non-functioning. Pineal calcification rates with Africans are five to 15 percent, Asians 15 to 25 percent and Europeans 60 to 80 percent. This is the chemical basis for the cultural differences between blacks and whites.

Five: Melanin endows Blacks with greater mental, physical and spiritual abilities — something which cannot be measured based on Eurocentric standards.

“The above is not an editorial from the *Final Call*, Louis Farrakhan’s free newspaper,” [Carlson explained](#). “That is a direct quote from the person Joe Biden is about to put in charge of this country’s civil rights laws.”

The short answer to Clarke’s walk through the fever swamps of black supremacy: Uh-oh.

Yet the bizarre journey into a subject Clarke knew nothing about, and still knows nothing about — genetics and brain chemistry — suggests that her inviting an anti-Semitic black professor to speak at Harvard is not surprising. That individual, the late “professor” [Tony Martin](#), wrote [The Jewish Onslaught](#), a book still available from Amazon despite that corporation’s putative obsession with the political hygiene of the products it retails.

Defund the Cops

Last week, [Fox News observed](#) that [Clarke, president](#) of the hard-left [Lawyers Committee for Civil Rights](#), wants to defund the police. [She wrote](#) at length about it for *Newsweek*.

“I advocate for defunding policing operations that have made African Americans more vulnerable to police violence and contributed to mass incarceration, while investing more in programs and policies that address critical community needs,” she wrote.

“We must invest less in police and more in social workers” because a police officer accidentally shot and killed a woman in her home.

“We must invest less in police and more in social supports in our schools,” she continued, because “more than 14 million students” don’t have nurses, therapists, and counselors. And “police presence inside schools does little to help our children, but serves as an on-ramp to the school-to-prison pipeline.”

“We must invest less in police and more in mental health aid,” she wrote, because the untreated mentally ill are “16 times more likely to die in encounters with police and make up as many as half of people killed by police.”

Amusingly, she blamed her soon-to-be boss’s [1994 crime bill](#) for the “mass incarceration” of blacks.

No Money for Whitey?

Clarke’s appointment followed another ominous announcement from Biden.

“Our priority will be Black, Latino, Asian, and Native American owned small businesses, women-owned businesses, and finally having equal access to resources needed to reopen and rebuild,” he announced of his Chinese Virus aid plan.

Veteran newsman Brit Hume explained the plan in a reply: “Racial discrimination, plain and simple.”

Kristen Clarke will enforce that racial discrimination.
