While cryptocurrencies and the technology behind them can help free humanity, there are powerful forces seeking to use them to surveil and control humanity, explains expert and Brownstone Institute Fellow Aaron Day on this episode of Behind The Deep State with The New American magazine Senior Editor Alex Newman. Day, whose recent article on the “Stablecoin Trap” went mega-viral, explains that Americans are already dealing with the equivalent of a Central Bank Digital Currency (CBDC) run by private companies. Under legislation currently being considered in Congress, it would get even worse. Don’t miss this fascinating conversation about one of the Deep State’s most important agendas.
