Dr. Pierre Kory: Addressing Epidemic of Post-vaccine Syndrome and Long Covid

The Covid-19 emergency is officially over, but the United States is facing the covert epidemic of long Covid as well as post-vaccine syndrome, which affected approximately eight percent of vaccine recipients. The government does not recognize the latter as a medical condition; therefore, there are no standards of care for the millions of people affected. [The Frontline Covid-19 Critical Care Alliance](#) (FLCCC) is filling yet another void, says Dr. Pierre Kory.

In this interview with the New American, Dr. Kory provides updates on the FLCCC protocols and describes the tragedy of vaccine-injured. Sadly, a sizable proportion of them are people in their prime. The public acknowledgement of the terrible consequences of the Covid vaccination campaign is now underway, as signified, among other things, by the candidacy of Robert F. Kennedy Jr., whom Dr. Kory holds in high regard.

Dr. Kory's book *War on Ivermectin: The Medicine That Saved Millions and Could Have Ended the Pandemic* is available [here](#).

Please follow Dr. Kory on [Substack](#) and [Twitter](#).

The conversation took place at the [Better Way Conference](#) in Bath, U.K. organized by the [World Council for Health](#).
