Since the rushed rollout of the mRNA Covid-19 injections, reports of resulting injuries and death have steadily trickled into the public news space, despite attempts to censor and discredit them. In this episode, we look at newly available personal communications between National Institutes of Health officials and the “vaccine” injured. The people who reached out to NIH were experiencing pain and loss at a level they never expected. And despite the harrowing experiences of so many, the government continued pushing those injections onto the public.

Also in this episode:

@ 24:23 | Will Trump go to jail?

@ 49:38 | John Birch Society CEO Bill Hahn on Ben Armstrong’s passing.
